EPA Award News Flash!

Suwannee American Cement (SAC) has received recognition from the United States Environmental Protection Agency for “No_x Control Strategies for Cement Plants (SNCR) as an innovative and outstanding achievement to improve air quality”. This recognition of commitment to not just comply with federal and state environmental laws and regulations, but to go above and beyond to assure sustainable development with minimal to no impact on the environment is a testament to SAC, Votorantim and it’s employees dedication and daily commitment.

The SAC team once again has set the standard for environmental compliance and has shown their continued commitment to be recognized as “The Best”.
